Mail Server Settings for JCWIFI.com email. – Windows Live Mail

Inside of Windows Live Mail, click on the Accounts tab at the top, then highlight your email account and click on properties.
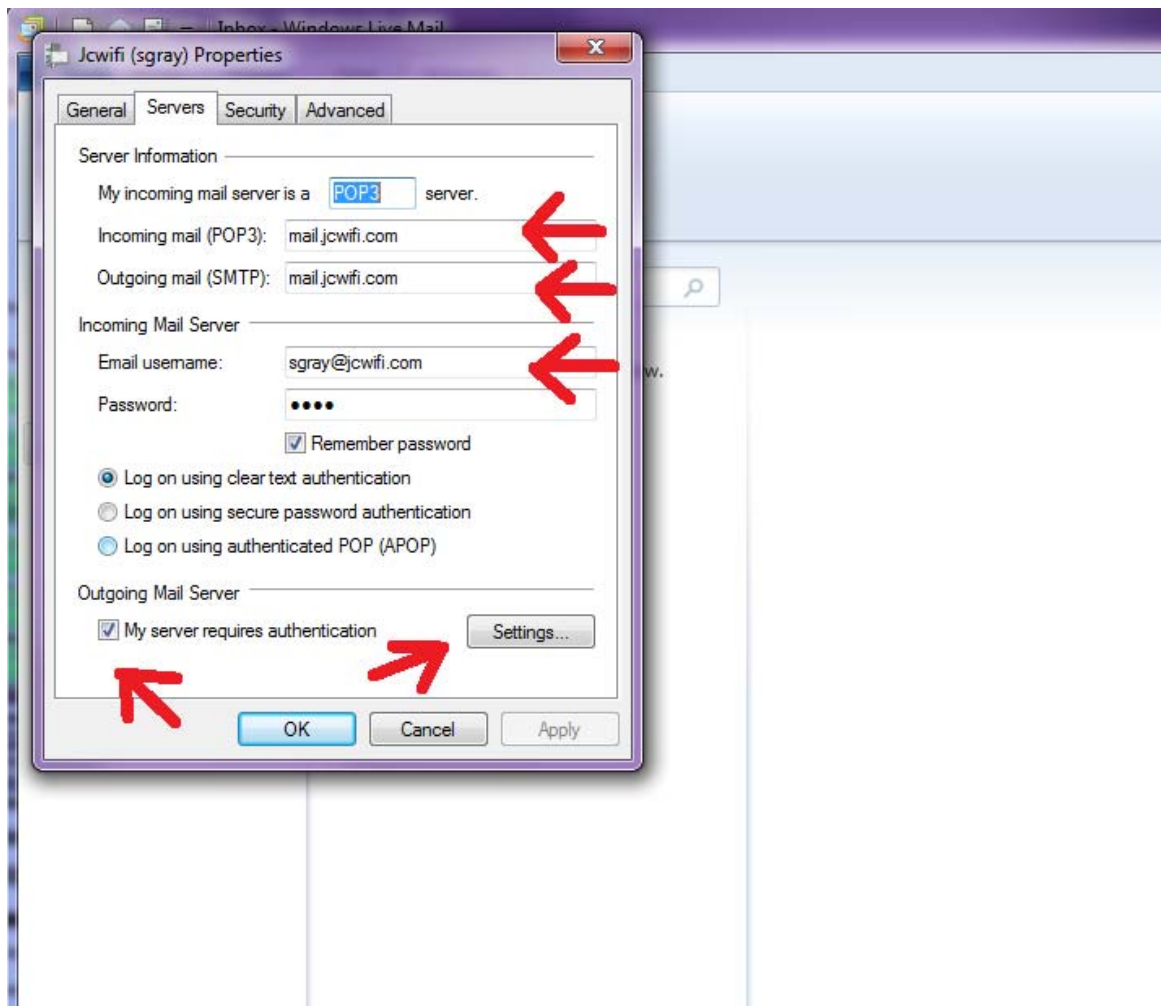

Click on the Servers Tab at the top of the new window that opens and change the following settings.
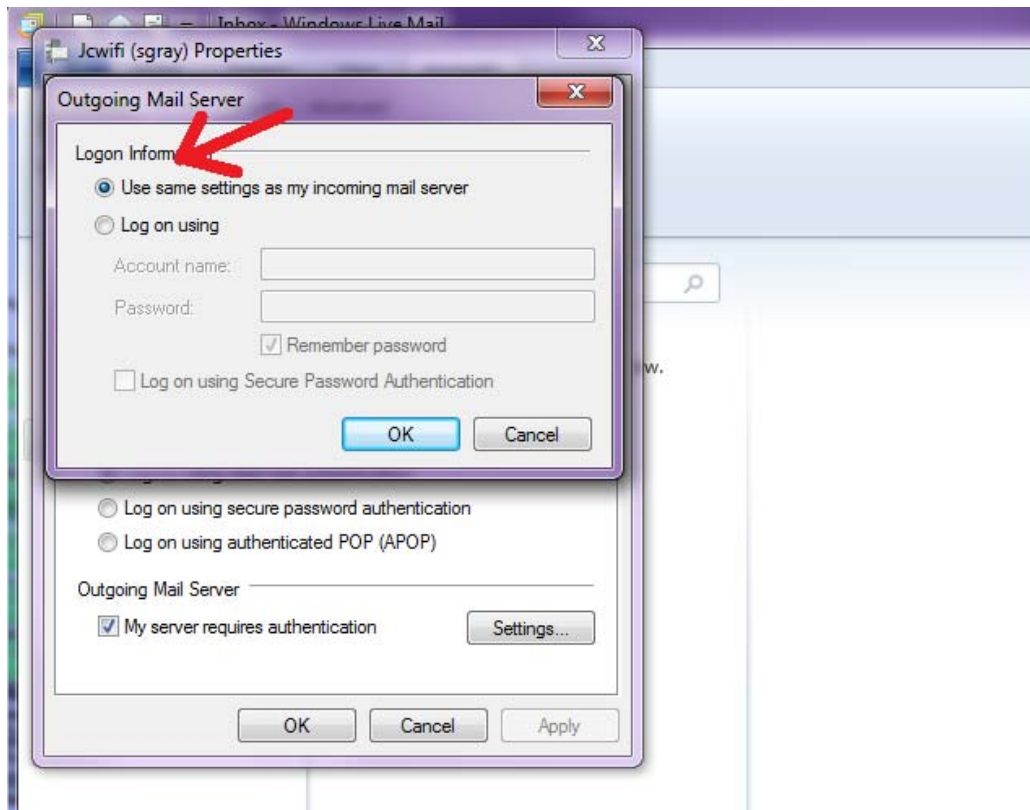

Incoming mail server = mail.jcwifi.com

Outgoing mail server = mail.jcwifi.com

User Name = your complete email address

Then click in the box next to "My server requires authentication" and click on settings.

Make sure "Use same settings as my incoming mail server" has the dot filled in, and click OK.

Click OK to save all the changes and close the window out. If your mail does not work, please call JCWIFI support at 815-233-2641.
