SMILE YOU'RE ON CAMERA

JCWIFI is excited to announce we have now included a Security Division within our current company!

At JCWIFI we continually strive to enhance our offerings to better cater to the evolving demands and needs of our clients.

Our Security Division has been developed to offer a wide variety of security cameras from wireless indoor security cameras to wired weatherproof outdoor cameras that can be connected to a Network Video Recorder (NVR) that delivers professional grade, around the clock recordings.

Video quality and recording capabilities have improved and the prices have come down making it affordable and easy to provide peace of mind for protecting what matters most, from wherever you are!

A security camera system is an excellent tool for protection, working both as a deterrent and recovery tool. Security cameras provide a live feed and immediate alerts of activity, allowing you to keep an eye on your children, pets and what's happening in and around your home. The two-way audio can act as an intercom when you are home or not at home. The recording capabilities are able to identify vehicles, people and other moving objects.

For a free consult and quote, give one of our friendly and experienced security technicians, Jason Bardell or Shane Rackow a call today!

JCWIFI Security Division protecting what matters most!
