

## OUTLOOK EXPRESS OR WINDOWS MAIL

Mail server setting for JCWIFI.com email. Inside of Outlook Express or Windows Mail, click on Tools from the top drop down menu. Then click on Accounts.

On the Internet Accounts window, select your jwifi.com mail account (If you have more than one, you will need to repeat this and all following steps for each account). Next click on Properties.

On the properties windows of your mail account, the important settings are  
Incoming Mail = mail.jcwifi.com  
Outgoing Mail = mail.jcwifi.com  
Email username/account name = your complete email address  
There is a check in the “my server requires authentication” box

Click ok and close until you are back to your mail. If your mail does not work, please call JCWIFI support at 815-233-2641
